Cherrypicks Limited

I. **Service Category (C) Cloud IT Services**

Table 1: Cloud IT Services Items (Service items passing all General, Security and Technical Requirements)

Item Number	Item Description	Manufacturer
C00001	To do storage and hosting to Azure cloud platform: ● 1a) Virtual Machines x 2 [2 vCPU(s), 4 GB RAM; Linux – Ubuntu; 1 managed OS disks – 32 GB] ● 1b) Load Balancer x 1 ● 1c) SQL Database x 1 [DTU Purchase Model, Standard Tier, S3 - 100 DTUs, 250 GB included storage per DB] ● 1d) Cache for Redis x 1 [C1: Standard tier] Storage x 1 [1,000 GB Capacity] ● 1e) Content Delivery Network x 1 [500 GB Data transfers per month]	Microsoft
C00002	To do storage and hosting to AWS cloud platform: ● 2a) Virtual Machines x 2 [2 vCPU(s), 4 GB RAM; Linux – Ubuntu; 1 managed OS disks – 32 GB] ● 2b) Load Balancer x 1 ● 2c) SQL Database x 1 [DTU Purchase Model, Standard Tier, S3 - 100 DTUs, 250 GB included storage per DB] ● 2d) Cache for Redis x 1 [C1: Standard tier] Storage x 1 [1,000 GB Capacity] ● 2e) Content Delivery Network x 1 [500 GB Data transfers per month] ● 2f) Included Trend Micro anti-virus software.	Amazon Web Services
C00003	To do storage and hosting to Aliyun cloud platform: ● 3a) Virtual Machines x 2 [2 vCPU(s), 4 GB RAM; Linux – Ubuntu; 1 managed OS disks – 32 GB] ● 3b) Load Balancer x 1 ● 3c) SQL Database x 1 [DTU Purchase Model, Standard Tier, S3 - 100 DTUs, 250 GB included storage per DB] ● 3d) Cache for Redis x 1 [C1: Standard tier]	Aliyun Cloud

Item Number	Item Description	Manufacturer
	Storage x 1 [1,000 GB Capacity] ● 3e) Content Delivery Network x 1 [500 GB Data transfers per month] ● 3f) Included Trend Micro anti-virus software	

II. <u>Government Public Cloud Related Services</u>

Table 2.1 : Staff Service

Item No.	Description of Services	Staff Category
0001	The Professional Service Package on running Azure platform included migration, storage and hosting, included: 1)Helps customers develop successful cloud transition plans 2)Enable efficient workload migration and resource orchestration 3)Provides recommended practices on cloud operations and governance 4)Delivers advanced operational and issue support	System Specialist
0002	The Professional Service Package on running Azure platform included migration, storage and hosting, included: 1)Helps customers develop successful cloud transition plans 2)Enable efficient workload migration and resource orchestration 3)Provides recommended practices on cloud operations and governance 4)Delivers advanced operational and issue support	Project Manager
0003	The Professional Service Package on running AWS platform included migration, storage and hosting, included: 1)Helps customers develop successful cloud transition plans 2)Enable efficient workload migration and resource orchestration 3)Provides recommended practices on cloud operations and governance 4)Delivers advanced operational and issue support	System Specialist
0004	The Professional Service Package on running AWS platform included migration, storage and hosting, included:	Project Manager

	1)Helps customers develop successful cloud transition plans 2)Enable efficient workload migration and resource orchestration 3)Provides recommended practices on cloud operations and governance 4)Delivers advanced operational and issue support	
0005	The Professional Service Package on running Aliyun platform included migration, storage and hosting, included: 1)Helps customers develop successful cloud transition plans 2)Enable efficient workload migration and resource orchestration 3)Provides recommended practices on cloud operations and governance 4)Delivers advanced operational and issue support	System Specialist
0006	The Professional Service Package on running Aliyun platform included migration, storage and hosting, included: 1)Helps customers develop successful cloud transition plans 2)Enable efficient workload migration and resource orchestration 3)Provides recommended practices on cloud operations and governance 4)Delivers advanced operational and issue support	Project Manager

Table 2.2 : Installation and Maintenance Service

Item No.	Description of Services
0001	Architecture Design Services, Deployment services and Managed services for installation and maintenance on the Azure platform
0002	Architecture Design Services, Deployment services and Managed services for installation and maintenance on the AWS platform
0003	Architecture Design Services, Deployment services and Managed services for installation and maintenance on the Aliyun Cloud platform
